

An emergency or a natural disaster can happen no matter where you are.

Whether you're at home... work... or traveling.

The new Australian Warning System is a national approach to warnings during emergencies.

On websites and apps, you'll see new icons for Advice... Watch and Act... and Emergency Warning.

If you see one near you, don't wait.

There'll be information about what to do to protect you and your family.

Over time you can expect to see more types of emergencies... in more places... using this new system.

So know what to look for...

And know what to do.
